DETAILED ACTION

1. Claims 1-21 are pending. Group I, claims 1-6 have been elected without traverse and claims 7-21 have been withdrawn in response to the Election/Restriction

Requirement filed 7/13/06. Claims 1-6 will be examined on the merits as set forth here below.

Drawings

- 2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Figure 4, reference sign "54"; Figure 5, reference signs "24" and "94"; and Figure 8, reference character(s) "40" and "60". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
- 3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: Figure 5, reference characters "96 I/F", "44", and "43". Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add

the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character Figure 5, "94" has been used to designate both EEPROM", "non-volatile memory" and "interface"; Figure 8, reference character "42" has been used to designate both "IrDAport" and "communication port" and reference character "60" has been used to designate both "IR port" and "port". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. Claim 1 has a step missing which is considered to be critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). Claim 1 recites "a communication port for interfacing with a user's portable electronic device and for receiving a transaction authorization therefrom; and means for receiving a requested transaction ...". There is an essential step missing after "receiving a transaction authorization." I cannot be determined what happens with the "receiving a transaction authorization" prior to "receiving a requested transaction".

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over (EPO 933 733 A2) Kwan.

As per claim 1. Kwan discloses, A self-service terminal comprising: a communication port for interfacing with a user's portable electronic device and for

receiving a transaction authorization therefrom (Page 2, col. 2 [0009], Page 3, col. 4 [0013], and Figure 1); and means for receiving a requested transaction from a user's portable electronic device and for fulfilling the requested transaction without the terminal preparing an authorization request (Page 3, col. 4 [0016] –Page 4, col. 5 [0017], col. 6 [0021], Page 5 [0025]- col. 8, line 25). However, Kwan does not expressly disclose fulfilling the requested transaction without the terminal preparing an authorization request. However, Kwan does disclose the user's electronic portable device is a personal data assistant and does not mention that the requested transaction is prepared by using an authorization request. The only steps that occur are the smart card reader reading the smart card to verify that the card belongs to that person and the information on the card such as a personal identification number (PIN) or biometric information.

As per claim 2. Kwan discloses A self-service terminal according to claim 1, further comprising (i) a dispenser for dispensing items, and (ii) means for cooperating with the dispenser to dispense an item to fulfill the requested transaction without the terminal preparing an authorization request (Page 3, col. 4 [0016] –Page 4, col. 5, line 14).

As per claim 3. Kwan discloses, A self-service terminal according to claim 1, further comprising (i) a storage area for receiving an item inserted by a user, and (ii) means for cooperating with the storage area to receive an item from a user as part of the requested transaction without the terminal preparing an authorization request (Page 3, col. 3 [0012]-col. 4 [0015] and Page 5 [0023]).

As per claim 4. Kwan discloses A terminal according to claim 1, wherein the communication port comprises a wireless communication port (Page 4, col. 5 [0017]-col. 6 [0020]).

As per claim 5. Kwan discloses A terminal according to claim 1, wherein the communication port comprises a physical cradle into which the user's portable electronic device couples (Page 3, col. 4 [0016] –Page 4,col. 5, line 14).

As per claim 6. Kwan discloses, A terminal according to claim 1, further comprising means for storing each transaction authorization for proving that a transaction has been executed (Page 5, col. 7 [0025] –col. 8, line 39).

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sehr (US 6,999,936 B2) disclosed pocket-sized computers and verification and validation can be used at various point-of-service locations.

Covert et al (US 6,334,117) disclosed and automated banking system.

Randle (US 5,787,403) disclosed a bank-centric access and control by a customer at a remote location.

Inquiries

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ella Colbert whose telephone number is 571-272-6741. The examiner can normally be reached on Monday, Tuesday, and Thursday, 5:30AM-3:00PM.

Application/Control Number: 09/848,003

Art Unit: 3693

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 571-272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
